

Key IYCF Questions to Include in Joint Assessments

1. How many children in the affected population are 0-5 months and 6-23 months?
2. Are mothers facing any difficulties in breastfeeding their children? If yes, what?
3. What foods are commonly fed to children 6-23 months of age? Are care providers facing any challenges feeding children of this age?
4. Have infant formula, other milk products, feeding bottles, pacifiers or packaged (complementary) foods been distributed? If yes, what and by whom?
5. Is there any nutrition help/service being provided to pregnant & lactating women and children under two years? If yes, which ones and where?
